SMARTER CLEANING

The Rubbermaid HYGEN™ Clean Water System features a Filter Bucket and Wringer with built-in scrubbers to help loosen and remove debris from the mop. Twin rollers allow for optimized wringing efficiency, and an innovative filtering system processes dirty water into clean water with a simple tilt of the bucket.

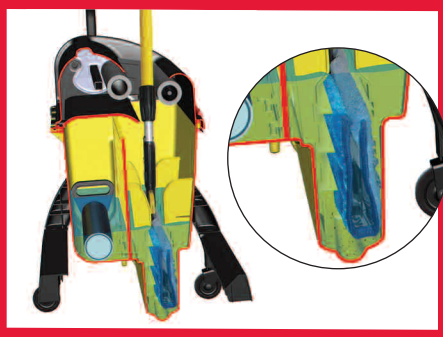
ROLLER WRINGER
Twin roller design provides optimized wringer efficiency.

See it in ACTION
www.rubbermaidhygen.com

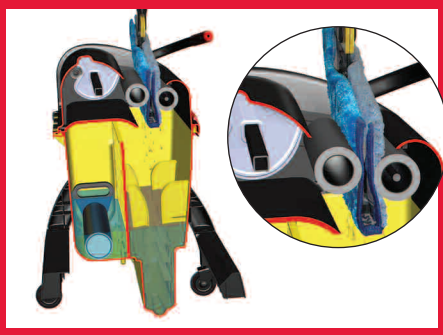
ADJUSTABLE MOISTURE LEVEL
Allows users to select desired mop dampness.

FLOOR DRAIN
Empties bucket without lifting.

COMPLETE SYSTEM
Fits all Rubbermaid Commercial Products cleaning carts.

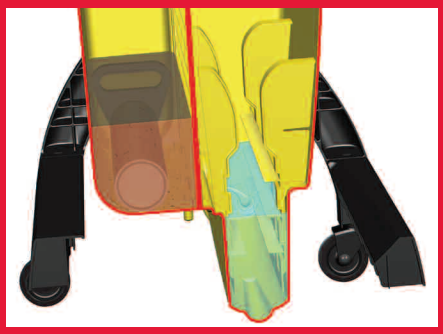


RINSING AND SCRUBBING
Insert the mop into the bucket. Move the mop up and down to enable the built-in scrubbers to remove soil from the mop.



WRINGING
Lift the mop to position it between the two rollers located at the top of the bucket. Press the handle down to wring the mop. Turn the adjustment dial to select your desired moisture level.

TRANSFERRING
Tilt the bucket 90 degrees by pressing the handle. This allows the dirty water to transfer to the chamber that has the integrated filter.



FILTERING
Once the water is completely transferred to the filter chamber, rotate the bucket back to its original position. Clean, filtered water will flow back into the mopping chamber, ready for mopping.
