TCell™ Refills

The TCell™ odor control system dispenses a consistent level of fragrance and Microtrans® odor neutralizer.

- On-trend, consumer-preferred fragrances
- Standard setting: 60 Days
- Light setting: 90 Days
- No propellants or added VOCs
- Recyclable refill components

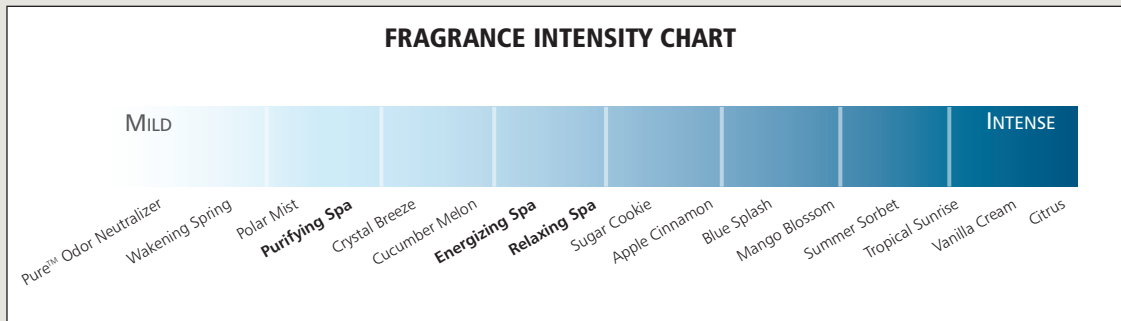

FUEL CELL TECHNOLOGY

The fuel cell creates hydrogen in the fragrance chamber. As each molecule of hydrogen is created, it forces an equal volume of fragrance and odor neutralizer out of the chamber. Natural airflow distributes the fragrance throughout the room.

TCell™ Odor Control Systems Refills

TCell™ provides the broadest fragrance and dispenser offering to represent consumer-preferred fragrance zones, increasing satisfaction for individual patrons. These exclusive, proprietary scents are offered individually or in a convenient "Preference Pack," which is a great solution for new customers to test and determine the right fragrance for their facility.
